Advisory Action

| Application No. | Applicant(s) | |
|-------------------------|--------------|--|
| 09/990,181 | GONDA ET AL. | |
| Examiner | Art Unit | |
| Richard Schnizer, Ph. D | 1635 | |

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 23 June 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

| PERIOD FOR REPLY [check either a) or b)] |
|--|
| a) \square The period for reply expires 4 months from the mailing date of the final rejection. |
| b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. I no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). |
| Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |
| 1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal. |
| 2. The proposed amendment(s) will not be entered because: |
| (a) X they raise new issues that would require further consideration and/or search (see NOTE below); |
| (b) ☐ they raise the issue of new matter (see Note below); |
| (c) 🗵 they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or |
| (d) they present additional claims without canceling a corresponding number of finally rejected claims. |
| NOTE: <u>See Continuation Sheet</u> . |
| 3. Applicant's reply has overcome the following rejection(s): |
| 4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s). |
| 5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See No. 2 above. |
| 6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection. |
| 7.⊠ For purposes of Appeal, the proposed amendment(s) a)⊠ will not be entered or b)☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. |
| The status of the claim(s) is (or will be) as follows: |
| Claim(s) allowed: |
| Claim(s) objected to: |
| Claim(s) rejected: <u>1-6 and 8-28</u> . |
| Claim(s) withdrawn from consideration: |
| 8. The drawing correction filed on is a) approved or b) disapproved by the Examiner. |
| 9. Note the attached Information Disclosure Statement(s)(PTO-1449) Paper No(s) |
| 10. Other: |

Continuation of 2. NOTE: The proposed amendment to claim 1 combines limitations that were considered previously in separate claims, but that were not considered previously in combination. For example, the previous claims did not require consideration of a composition comprising water and physiological pH combined with either or both of limitations regarding aerodynamic diameter or reduction in volume of DNA. As such, this amendment could require new consideration and formulation of new rejections. Even so, all of the proposed claim are considered to be obvious over the existing combination combination of Gautam (2000), Douthart (1983), Douthart (1982), Dubensky (1999), Unger (1995), and Gonda (2000) as previously applied to claims 6, 9, 27, and 28. Applicant does not respond specifically to this rejection, but generally argues that the references are not combinable because none of them teaches the required reduction in volume of the DNA molecule. This is unpersuasive fo the reasons of record, i.e. that this reduction is inherent. The importance of DNA condensation in aerosol-mediated transfection of lung cells was well appreciated at the time of the invention as evidenced by the teachings of Gautam and Dubensky. Applicant has presented no evidence or reasoning as to why one of ordinary skill in the art would no have expected cationic aminoglycosides to condense DNA, or why one would not substitute cationic aminoglycosides for the PEI of Gautam. Where, as here, the claimed and prior art products are identical or substantially identical, or are produced by identical or substantially identical processes, the PTO can require an Applicant to prove that the prior art products do not necessarily or inherently possess the characteristics of his claimed product. See In re Ludtke, supra. Whether the rejection is based on "inherency" under 35 USC 102, on "prima facie obviousness" under 35 USC 103, jointly or alternatively, the burden of proof is the same, and its fairness is evidence by the PTO's inability to manufacture products or to obtain and compare prior art products. In re Best, Bolton, and Shaw, 195 USPQ 430, 433 (CCPA 1977) citing In re Brown, 59 CCPA 1036, 459 F.2d 531, 173 USPQ 685 (1972). Applicant's opinion that the reduction in volume is critical for the production of an aerosol of sufficiently small size to be deliverable to the lungs of a human patient is not supported by evidence or reasoning, and is unpersuasive.
